Faculty of Biology Chair of Animal Ecology and Zoogeography

Scientific field (Frascati Manual)

Entomology

Marine biology, freshwater biology, limnology

Ecology

Biodiversity conservation

Brief description of expertise

-Ecology, faunistics, and conservation biology of mammals and reptiles. -Idioecology, population dynamics, interspecies interactions (competition and predator-prey relationships) of ecologically or commercially important and/or threatened fishes. - Ecotoxicological research, bioaccumulation and biomagnification of heavy metals and microelements in natural fish populations. -Community analyses in freshwater and marine ecosystems. -Biogeography/faunistics, systematics, and ecology of Hymenoptera (predatory and parasitoid wasps, bees) and several other insects groups. -Complex fundamental-applied research in protection and conservation of biodiversity of Serbia and of Montenegro, focused on several animal groups (insects, fishes, amphibians, reptiles, mammals), detection and/or analysis of the status and negative impact of invasive species in Serbia, the Balkans, and Euro-Asia.

Keywords

Ecology, Population dynamics, Conservation biology, Ecotoxicology, Faunistics, Biogeography, Insects, Fishes, Mammals, Reptiles and amphibians

Realized and current projects

A) NATIONAL PROJECTS

Title	Project ID	Funding source	Duration
AGROBIODIVERSITY AND SOIL			
USAGE IN SERBIA:		Ministry of Education, Science	
INTEGRATED BIODIVERSITY	43001	and Technological	2011-2014
ASSESSMENT OF KEY GROUPS	43001	Development of the Republic	2011-2014
KLJUČNIH GRUPA ARTROPODA		of Serbia	
I BILJNIH PATOGENA
