DanubePeerChains

EUROPEAN UNION

Integrated capacity building and training programme for DANUBE area labour and business support organisations, local industry and entrepreneurs to enter innovative transnational value CHAINS as PEER-level collaboration partners
DTP3-497-SO1.2

Collection of support instruments in place to develop labour markets in digitalization

Deliverable D.T1.1.2

Lead Contractor of the Deliverable: ERDF PP5 INCSMPS

September 2020

Content

DanubePeerChains

Background

DanubePeerChains has as main objective to empower Labour market Support Organisations (LSO) and Business Support Organisations (BSO) together with their target groups and further local high-potentials in a joint capacity building and training approach to upskill to high-qualified jobs in the Danube region and to gain sustainable recognition as PEER-level collaboration partners in innovative transnational value chains. In particular, the project strives to 1) identify high-potential cooperation fields in digitalized value chains for project target sectors (metal industry, machine building, engineering, electro industry, electronics/robotics, ICT), 2) introduce this innovative approach in collaborative capacity building measures for LSOs/BSOs, and 3) upgrade existing technological and business model oriented trainings by integrating the value chain perspective and adapting them for the qualification demand of Danube area target groups.

Transnational benchmark analysis of labour market incl. identification of qualification and support demand (DT 1.1.3) as part of WP1, is one of the prerequisites for the development of the capacity building and qualification measures as well as for strategic project work and thus contributes to all three specific objectives. The transnational benchmark analysis as main result of A.T1.1 will be ready to be discussed at partnership level in SC meeting #1 in Ljubljana as a main reference for further project work. Specific labour market analysis in Activity T1.1 will be operationally managed by WP T1 co-leader INCSMPS, who will also prepare the according templates, to be filled in by selected PPs.

The present template, prepared by INCSMPS, is accordingly with D.T.1.1.2, with the title: collection of support instruments in place to develop labour markets in digitalization. Partners from BSOs and LSOs, each within their scope of activities, will contribute to a cross-institutional overview of already existing funding schemes and non-financial support instruments targeted at strengthening digital transformation of regional industries and upskilling of qualified workers, incl. post-COVID-19 support measures.

Support schemes and programs strengthening digital transformation and supporting qualification demand

Chapter 1 provides a cross-institutional overview of already existing funding schemes and non-financial support instruments targeted at strengthening digital transformation of country industries, upskilling of qualified workers and Post COVID19 support measures.

Financial environment

Financial instrument, guarantees, loans, etc.

Please describe selected national/regional instruments, ...

Supporting Measures

Support measures targeted at strengthening digital transformation of regional industries, upskilling of qualified workers) -European Union Programs, Europe 2020 flagship initiative, Cohesion policy (ERDF, ESF, CF)

National/regional schemes supporting digital transformation (business and labour)

Country	Measure/call	Objective	Implementation body	Budget (Mil euro	Beneficiary	Financing rate	Year from	Year to

Table 1

Post COVID19 support measures

Identification of national / regional instruments and measures on labour market and economy as reaction at Covid 19.

Country	Measure/call	Objective	Implementation body	Budget (Mil euro	Beneficiary	Financing rate	Year from	Year to

Table 2

Main projects (EU / national / regional) in place to develop digital transformation of regional industries and upskilling of qualified workers

Chapter 2 provides a cross-institutional projects overview targeted at strengthening digital transformation of regional industries and upskilling of qualified workers.

Projects addressing digital transformation of regional industries
